Arifuzzaman Antor

Senior SDET | Test Automation Architect | Technical Project Manager

arifuzantor@gmail.com · linkedin.com/in/azantor · github.com/azaworld · azantor.xyz

SUMMARY

Senior SDET and Technical Project Manager with 6+ years of test automation, QA leadership, and delivery management for US e-commerce, healthcare, payments, and insurance companies. Builds Playwright and TypeScript frameworks wired into CI/CD release gates, owns manual, API, mobile, security, load, and performance testing, and validates AI/LLM output. Fully remote since 2020 on async-first US and UK teams.

KEY ACHIEVEMENTS

- Compressed a 12-month EDI integration program into **about 60 days** (about 80% faster), leading a **30+ person** cross-functional team
- Led QA for a healthcare app from first manual pass to **App Store and Google Play release**; pilot completed **26,840+ rides** for 5,000+ members
- Raised performance by **60%**, cut critical defects by **30%**, and sped up mobile testing by **40%** on national government systems

AI QA PROCESS

- **Testing AI systems:** validate non-deterministic LLM output with model regression suites, output validation matrices, and edge-case sets; evaluated NLP accuracy for a government AI spell checker
- **AI agents in testing:** run Playwright MCP agents on staging to explore flows and generate candidate Playwright tests, then review and harden every assertion before it runs in CI (AI x QA playbook)
- **AI-assisted test design:** use Claude, GPT, and Copilot to draft test cases, test data, and bug reports, and verify each suggestion before it is used

CORE SKILLS

- **Test Automation:** Playwright, TypeScript, JavaScript, Cypress, Selenium, Appium (iOS and Android), Cucumber/Gherkin, Page Object Model
- **API, Integration, and EDI:** Postman, REST Assured, GraphQL, EDI and marketplace integrations, AWS Lambda, SQS, and S3 event testing
- **Performance and Security:** k6, JMeter, Locust, LoadRunner, Grafana, InfluxDB, Prometheus, OWASP ZAP, Burp Suite, Kali Linux
- **CI/CD and Cloud:** GitHub Actions, Jenkins, GitLab CI, AWS (EC2, Lambda, SQS, S3, CodePipeline, Device Farm), Docker, Terraform, PM2
- **Delivery and Leadership:** project management, hiring, roadmaps, risk registers, release management, executive reporting, Jira, TestRail, QASE, HubSpot
- **Languages:** TypeScript, JavaScript, Python, Java, SQL

EXPERIENCE

Technical Project Manager & QA Lead · Platformz · Remote, US client · Sep 2024 – Present

Builds omnichannel commerce, marketplace, and B2B platforms with AI agents and workflow automation.

- Run delivery for three client platforms: roadmaps, sprint and release planning, risk registers, and daily delivery cadence across retail, EDI, fulfillment, and engineering
- Hired and lead a 30+ person team of frontend, backend, DevOps, QA, design, marketing, and HubSpot specialists; set the team's QA and release standards
- Report roadmap, delivery status, quality, risk, and budget alignment to the CEO and CTO
- **FUR4:** QA across the storefront, dealer portal, referral portal, ops dashboard, and AI operations tower on Magento, React, and GraphQL. Delivered a 3P EDI program across Amazon, Walmart, Target, Chewy, eBay, and Macy's in about 60 days, covering EDI document lifecycles, inventory rules, and SLAs
- **Rockerz:** QA for a 4-zone product color configurator, storefront, dealer portal, dealer locator, and referral portal on Magento, React, and AWS
- **DMV Raw Feeders:** QA for zone-based delivery routing, subscription management, and referral flows
- Built EcomTestPilot, a Dockerized Playwright suite on AWS EC2 that tests production flows every 15 minutes with Microsoft Teams alerts GitHub
- Own QA end to end on all portals: manual, API, OWASP ZAP and Burp Suite security, and JMeter and k6 load testing with InfluxDB and Grafana GitHub

Senior SDET · Kintsugi (AI sales-tax compliance, San Francisco, remote) · Sep 2025 – Aug 2026
- Feature lead: drove features end to end and owned the engineering process for an AI tax-compliance platform
- Built Playwright and TypeScript suites, with Postman API tests, that gate every merge through CI
- Designed verification for non-deterministic AI/LLM tax logic: model regression suites, output validation, and edge cases across changing tax rules

QA Engineer I · Kinetik (healthcare NEMT platform, New York, remote) · Sep 2023 – Sep 2025
- Led QA for the Kinetik Health App (iOS and Android) through to App Store and Google Play release; 26,840+ rides completed in pilot
- Manual QA across the trip scheduler, trip assistant, RCM, and member app, including UAT
- Built Playwright API automation for AWS Lambda, SQS, and S3, plus Magento data-sync checks with QuickBooks, ShipBob, and Mailchimp
- Built Appium suites for iOS and Android, ran load tests, and owned release gates for a platform with 13M+ trips and 1.5M+ members

Software Automation Engineer II · All Generation Tech (insurance, New York, remote) · Feb 2024 – May 2026
- Built and maintained CI-integrated automation frameworks for CFC, Tokio Marine Kiln, and American National (ANICO)
- Maintained regression and API suites for regulated claim, premium, and compliance workflows

Sr. Automation and Reliability Engineer · Mastercard (payments, remote) · Jan 2025 – Jun 2025
- Built functional and performance automation for web and mobile, with CI/CD pipelines in Jenkins, GitLab CI, and AWS CodePipeline
- Ran chaos engineering sessions and load tests (JMeter, Locust); built Prometheus and Grafana monitoring and alerting
- Provisioned infrastructure with AWS and Terraform, wrote incident-response and disaster-recovery playbooks the team adopted, and mentored junior engineers

Software QA Engineer · Grameenphone via Miaki (telecom) · Feb 2024 – Mar 2025
- Built the complete backend API automation framework from zero (Playwright and TypeScript) for MyGP, the app of the country's largest mobile operator, covering the full backend surface with repeatable regression runs

Senior QA Engineer (augmented) · Intelex via Tata Consultancy Services (US client, remote) · 2024 – 2025
- QA for a global Magento platform across the USA, UK, Canada, and Europe: registration, catalog, checkout, multi-currency, and multi-language
- Tested 2FA and verification with Twilio and SendGrid, built Selenium suites, and validated QuickBooks, ShipBob, and Mailchimp integrations

Software QA Engineer and Lead · REVE Systems (government systems) · Dec 2022 – Aug 2023
- QA Lead for Sothik, the government's AI Bangla spell checker: NLP accuracy evaluation, regression, and security testing; mentored the QA team
- QA for the national customs bond system (CBMS): security and performance testing with OWASP ZAP, Burp Suite, JMeter, and LoadRunner
- Mobile testing across Android and iOS with Xamarin Test Cloud and AWS Device Farm, speeding up mobile test cycles by 40%

Jr. Software QA Engineer · Dynamic Solution Innovators · Sep 2021 – Nov 2022
- Automated OpenCRVS, the UN-backed civil registration system, with Cypress and CI; manual QA for the national IPEMIS education system
- Wrote test plans and managed TestRail suites across OpenCRVS, IPEMIS, Movandi, and Altech

Jr. QA Engineer (part-time) · CarryBags Ltd (e-commerce, London, remote) · Jul 2020 – Aug 2021
- Functional, compatibility, and performance testing for a UK e-commerce startup, including manual Android and iOS testing

---

PROJECTS AND SOURCES OF WORK

- **GitHub projects:** EcomTestPilot (Playwright, Docker, AWS) · FUR4 k6 Load Testing (k6, Grafana) · k6 GraphQL · FirstTrip Playwright · QA Roadmap
- **Portfolio:** azantor.xyz · azantor.xyz/sdet · **GitHub:** github.com/azaworld

---

EDUCATION

B.Sc. Engineering, Computer Science and Engineering · Shahjalal University of Science and Technology (SUST), 2017–2020

ADDITIONAL

- **Freelance:** Upwork Top Rated, 23 engagements, all rated 5.0 · Upwork profile
- **Domains:** healthcare (HIPAA), fintech (PCI-DSS), insurance, telecom, e-commerce, government · **Languages:** English (professional), Bangla (native)
