Arifuzzaman Antor

Project Manager | Technical Project Manager | Agile Delivery and QA Leadership

arifuzantor@gmail.com · linkedin.com/in/azantor · github.com/azaworld · azantor.xyz

SUMMARY

Project Manager with 6+ years delivering software projects for US and global clients in e-commerce, healthcare, payments, insurance, telecom, and government. Leads end-to-end planning, execution, and delivery with Agile and Scrum: defining scope, timelines, and resources with technical teams and clients, managing risks and dependencies, and keeping stakeholders aligned. Currently Technical Project Manager at Platformz, leading a 30+ person team across 10 production portals for 4 brands, and reporting directly to the CEO and CTO.

KEY ACHIEVEMENTS

- Delivered a 12-month EDI marketplace integration program in **about 60 days** (about 80% faster) across Amazon, Walmart, Target, Chewy, eBay, and Macy's
- Manage delivery of **10 production portals for 4 brands**, with a **30+ person** cross-functional team
- Took a healthcare app from first manual test pass to **App Store and Google Play release**; pilot completed **26,840+ rides**
- As QA Lead on a national government AI system, raised performance by **60%** and cut critical defects by **30%**

CORE COMPETENCIES

- **Project Delivery:** end-to-end planning and execution, scope definition, timelines, resource planning, milestones, release management
- **Methodologies:** Agile, Scrum, Kanban, sprint planning, backlog grooming, retrospectives, risk-based planning
- **Risk and Governance:** risk registers, RAID logs, dependency tracking, issue escalation, quality gates, project documentation
- **Stakeholder Management:** client communication, executive and board reporting, cross-functional coordination, vendor management
- **Team Leadership:** hiring, onboarding, team management, mentoring, setting process and quality standards
- **Tools:** Jira, Confluence, QASE, TestRail, HubSpot, GitHub, Slack, Microsoft Teams
- **Technical Background:** Magento, React, GraphQL, AWS, EDI, CI/CD, Playwright, k6, JMeter

CREDENTIALS

- **Government-issued Freelancer ID:** Department of ICT, ICT Division · Professional title: Technical Project Manager · Valid Aug 2026 – Aug 2029 · Verification

EXPERIENCE

Technical Project Manager & QA Lead · Platformz · Remote, US client · Sep 2024 – Present

Platformz builds omnichannel commerce, marketplace, and B2B platforms. I lead delivery for three client brands and the company's own platform.

- Lead end-to-end planning, execution, and delivery of **10 production portals across 4 brands**, from scope and timelines to release
- Define project scope, timelines, milestones, and resource plans with engineering teams and clients
- Run Agile and Scrum delivery: sprint planning, backlog prioritization, daily stand-ups, and release planning across retail, EDI, fulfillment, and engineering workstreams
- Track progress and deliverables, and manage risks, issues, and dependencies with risk registers and RAID logs
- Hired and lead a 30+ person team of frontend, backend, DevOps, QA, design, marketing, and HubSpot specialists
- Report roadmap, delivery status, risks, and budget alignment to the CEO and CTO
- Own quality across every deliverable: manual, API, security, load, and performance testing, plus automated monitoring with Microsoft Teams alerts
- **FUR4 (4 portals):** customer storefront, referral portal, dealer portal, and admin portal. Delivered a 3P EDI program across six marketplaces in about 60 days instead of 12 months
- **Rockerz (3 portals):** customer storefront with a 4-zone product configurator, referral portal, and dealer portal
- **DMV Raw Feeders (1 portal):** delivery routing, subscription management, and referral flows
- **Platformz (2 portals):** the company's own customer portal and referral portal

Senior SDET (Feature Lead) · Kintsugi (AI sales-tax compliance, San Francisco, remote) · Sep 2025 – Aug 2026

- Led features end to end: planning, engineering coordination, test strategy, and release readiness for an AI tax-compliance platform
- Coordinated async across a 12-hour time difference with the San Francisco team

QA Lead (QA Engineer I) · Kinetik (healthcare, New York, remote) · Sep 2023 – Sep 2025
- Managed the full QA process for the Kinetik Health App (iOS and Android), from first test pass to App Store and Google Play release
- Planned test coverage and release gates across four products (trip scheduler, trip assistant, RCM, and member app), coordinating product, engineering, and DevOps
- Owned release sign-off for a platform with 13M+ trips and 1.5M+ members
- Set up a staged QA approach (manual, then API automation, mobile automation, and load testing) that the wider organization adopted

Software Automation Engineer II · All Generation Tech (insurance, New York, remote) · Feb 2024 – May 2026
- Coordinated automation delivery for three regulated insurance clients: CFC, Tokio Marine Kiln, and American National (ANICO)
- Maintained CI-integrated regression and API suites across multiple products for claim, premium, and compliance workflows

Sr. Automation and Reliability Engineer · Mastercard (payments, remote) · Jan 2025 – Jun 2025
- Led reliability, chaos engineering, incident-response, and disaster-recovery initiatives with platform engineers; mentored junior engineers
- Wrote incident-response and disaster-recovery playbooks the team adopted, and supported on-call for critical production systems

QA Process Lead (Software QA Engineer) · Grameenphone via Miaki (telecom) · Feb 2024 – Mar 2025
- Planned and delivered the complete backend automation framework for MyGP, the country's largest telecom app, and managed the QA process from setup to regular regression runs
- Covered the full backend surface with repeatable regression, giving the release team a reliable go or no-go signal

Augmented Senior QA Engineer · Intelex via Tata Consultancy Services (US client, remote) · 2024 – 2025
- Coordinated QA for a global Magento platform across four regions (USA, UK, Canada, Europe), covering regional requirements and third-party integrations, with daily client reporting
- Validated a multi-region launch end to end, covering multi-currency, multi-language, 2FA, and QuickBooks, ShipBob, and Mailchimp integrations

QA Lead (Software QA Engineer and Lead) · REVE Systems (government systems) · Dec 2022 – Aug 2023
- Led the QA process for Sothik, the government's AI Bangla spell checker: planning, team coordination, and stakeholder updates. Raised performance by 60% and cut critical defects by 30%
- Managed QA delivery for the national customs bond system (CBMS) with full test documentation; mentored the QA team
- Introduced a risk-based test strategy and sped up mobile test cycles by 40%

Jr. Software QA Engineer · Dynamic Solution Innovators · Sep 2021 – Nov 2022
- Managed test plans and TestRail suites across four projects, including OpenCRVS (UN-backed civil registration) and IPEMIS (national education system)
- Wrote detailed test plans that became the team's standard, and integrated OpenCRVS Cypress tests into CI

Jr. QA Engineer (part-time) · CarryBags Ltd (e-commerce, London, remote) · Jul 2020 – Aug 2021
- Functional, compatibility, and performance testing for a UK e-commerce startup, with stakeholder-ready bug reports

---

EDUCATION

B.Sc. Engineering, Computer Science and Engineering · Shahjalal University of Science and Technology (SUST), 2017–2020
