

Professional Summary

Senior quality engineer with **6+ years** of experience building automation and release-confidence systems across web, mobile, API, performance, security, and reliability engineering. Strong hands-on delivery with **Playwright + TypeScript**, Selenium, Cypress, Appium, Postman, k6/JMeter, Docker, AWS, Terraform, and CI/CD. Built MyGP's complete backend automation framework, led mobile QA through production launch at Kinetik, and engineered resilience for payment-critical systems at Mastercard. Upwork Top Rated with 23 completed jobs and a 5.0 rating.

Core SDET Competencies

|                               |                              |                           |
|-------------------------------|------------------------------|---------------------------|
| • Automation Architecture     | • API & Contract Testing     | • Mobile Automation       |
| • Performance Engineering     | • Security Testing           | • CI/CD Quality Gates     |
| • Reliability & Observability | • Test Strategy & Release QA | • Mentoring & Code Review |

Professional Experience

Senior Software QA Engineer · SDET · Sep 2025 – Aug 2026

Kintsugi — San Francisco, USA (remote)

- Built Playwright + TypeScript automation and CI quality gates for an AI-powered sales-tax platform where correctness is product-critical.
- Partnered with engineering on feature-level quality, risk analysis, regression coverage, and release readiness.

Software Automation Engineer II · Feb 2024 – May 2026

All Generation Tech — New York, USA (remote)

- Designed and maintained automation for regulated insurance platforms serving CFC, Tokio Marine Kiln, and American National (ANICO).

Senior Software Automation & Reliability Engineer · Jan 2025 – Jun 2025

Mastercard — remote

- Built functional and performance automation; ran JMeter/Locust load tests and controlled chaos-engineering exercises for payment-critical systems.
- Implemented Prometheus/Grafana observability, AWS + Terraform infrastructure automation, CI/CD pipelines, and incident-response/DR playbooks.

Augmented Senior Software QA Engineer · 2024 – 2025

Intelex via TCS — US client

- Automated global Magento commerce coverage across four regions, including Twilio 2FA, multi-currency/language flows, and QuickBooks, ShipBob, and Mailchimp integrations.

Software QA Engineer · Feb 2024 – Mar 2025

Grameenphone via Miaki — MyGP

- Architected and built the complete Playwright backend automation framework from zero for MyGP, covering the full backend regression surface.

Software QA Engineer I · Sep 2023 – Sep 2025

Kinetik — New York, USA (remote)

- Led QA for Trip Scheduler, Trip Assistant, RCM, and the Kinetik Health App; delivered manual, API, Appium mobile, security, and load coverage.
- Took the iOS/Android member app through production release; automated AWS-backed flows using Playwright, Lambda, SQS, and S3.

Software QA Engineer & Lead · Dec 2022 – Aug 2023

REVE Systems — Dhaka

- Led QA for Sothik and CBMS; improved Sothik performance by 60% and reduced critical defects by 30% through regression strategy.
- Executed JMeter/LoadRunner performance tests and OWASP ZAP, Burp Suite, and Kali Linux security assessments.

Junior Software QA Engineer · Sep 2021 – Nov 2022

Dynamic Solution Innovators — Dhaka

- Built Cypress automation for OpenCRVS and delivered QA for IPEMIS, Movandi 5G, and Altech using TestRail and CI practices.

Software QA Engineer (part-time) · Jul 2020 – Aug 2021

CarryBags Ltd — London, UK (remote)

- Delivered functional, usability, compatibility, performance, mobile, and cross-device testing with disciplined regression coverage.

Technical Toolkit

|            |            |           |         |                |           |              |
|------------|------------|-----------|---------|----------------|-----------|--------------|
| Playwright | TypeScript | Selenium  | Cypress | Appium         | Postman   | REST Assured |
| GraphQL    | k6         | JMeter    | Locust  | LoadRunner     | OWASP ZAP | Burp Suite   |
| Docker     | AWS        | Terraform | Jenkins | GitHub Actions | GitLab CI | Grafana      |
| Prometheus | QASE       | TestRail  | Jira    | Allure         | SQL       | Magento      |

Selected Engineering Outcomes

- Built MyGP's complete backend automation framework from zero with Playwright.
- Led Kinetik Health App QA through App Store and Google Play production release.
- Improved Sothik performance by 60% and reduced critical defects by 30%.
- Created payment-system resilience coverage using load, observability, chaos, and DR practices.
- Delivered 23 freelance QA engagements with a 5.0 rating and Top Rated status on Upwork.

Education

- B.Sc. Engineering, Computer Science & Engineering — Shahjalal University of Science and Technology · 2017–2020
