Arifuzzaman Antor

Senior SDET | Test Automation Architect

Dhaka, Bangladesh · arifuzantor@gmail.com · linkedin.com/in/azantor · github.com/azaworld · azantor.xyz

PROFESSIONAL SUMMARY

Senior SDET with **6+ years** building test automation systems for US healthcare, fintech, and insurance companies—entirely as a remote engineer on distributed teams (SF, NY, London, 12-hour offsets, async-first). Led QA for a NEMT platform processing **13M+ trips and $1.1B+ in claims**, taking its member app from first manual test pass to production App Store & Google Play release. Core stack: **Playwright + TypeScript**, CI/CD (GitHub Actions, Jenkins), Docker/AWS, k6, and AI-assisted testing—including a year testing production AI/LLM tax logic at a San Francisco compliance startup.

CORE SKILLS

Languages	TypeScript, JavaScript, Python, Java, SQL
Automation & Frameworks	Playwright, Cypress, Selenium, Appium (iOS & Android), REST Assured, Postman, k6, JMeter, Cucumber/Gherkin (BDD), Page Object Model
CI/CD & Infrastructure	GitHub Actions, Jenkins, GitLab CI, continuous integration (CI) / continuous delivery (CD), Docker, AWS (EC2, Lambda, SQS, S3), Terraform, PM2
AI & Modern Practice	Testing AI/LLM systems (non-deterministic outputs, model regressions), AI-assisted test generation (Claude, GPT, Copilot), shift-left testing, observability (Grafana, InfluxDB, Prometheus), security testing (OWASP ZAP, Burp Suite)
Testing Depth	Manual & exploratory, API, mobile, performance, security, accessibility, cross-browser/cross-device · Jira, QASE, TestRail, Allure

WORK EXPERIENCE

Senior SDET

Sep 2025 – Aug 2026

Kintsugi — San Francisco, CA (remote) · AI-powered sales-tax compliance

- Owned quality end-to-end for an AI tax-compliance platform where a wrong number is a compliance incident—built Playwright + TypeScript suites gating every merge through CI/CD
- Designed verification for non-deterministic AI/LLM tax logic: model-regression suites, output-validation matrices, and edge-case coverage across shifting tax regulations
- Drove features as engineering lead—owned process, quality, and delivery while collaborating async across a 12-hour offset with the SF team

Technical Project Manager & QA Lead

Sep 2024 – Present

Platformz — platformz.us (remote, US client) · Enterprise e-commerce

- Built EcomTestPilot, a Dockerized Playwright E2E suite on AWS EC2 monitoring 5 production portals every 15 minutes (~96 runs/day) with Microsoft Teams alerting—regressions surface before customers report them
- Introduced k6 load testing for GraphQL APIs with InfluxDB + Grafana dashboards, establishing performance baselines for peak e-commerce events
- Compressed a 12-month EDI integration program into ~60 days (~80% schedule reduction) while leading a 30+ person cross-functional team
- Ran OWASP ZAP security reviews and JMeter load tests across the FUR4, Rockerz, and DMV Raw Feeders portals

QA Engineer I

Sep 2023 – Sep 2025

Kinetik — Long Island City, NY (remote) · Healthcare / NEMT

- Led QA for the Kinetik Health App from first manual test pass to production App Store & Google Play release; pilot completed 26,840+ rides
- Built Playwright API automation against AWS Lambda / SQS / S3 event pipelines and Appium mobile suites for iOS & Android
- Owned release gates for a platform processing 13M+ trips, $1.1B+ in claims, and 1.5M+ members—trip scheduler, trip assistant, RCM, and member app
- Worked fully embedded in a New York engineering org for 2 years—daily async standups, written test reports, US-EST overlap

Software Automation Engineer II
Feb 2024 – May 2026

All Generation Tech — New York, NY (remote) · Insurance

- Delivered test automation with CI integration across 3 enterprise insurance platforms (CFC, Tokio Marine Kiln, ANICO)—regulated claim processing, premium calculation, and compliance workflows

Software QA Engineer
Feb 2024 – Mar 2025

Grameenphone (via Miaki) — Dhaka · Telecom

- Architected the backend API automation framework from zero (Playwright + TypeScript) for MyGP, the country's largest telecom self-service app serving millions of users

Sr. Automation & Reliability Engineer
Feb 2022 – Aug 2023

Mastercard — remote · Payments

- Built functional and performance automation at payments scale; engineered CI/CD pipelines with Jenkins, GitLab CI, and AWS CodePipeline
- Ran chaos engineering sessions, built Prometheus + Grafana observability dashboards, and authored incident-response & disaster-recovery playbooks; managed infrastructure with Terraform

Software QA Engineer & Lead
Dec 2022 – Aug 2023

REVE Systems — Dhaka · Government systems

- Improved performance +60% and cut critical defects −30% as QA Lead for Sothik (spell.bangla.gov.bd), the government's AI-powered Bangla spell checker
- Security-tested the national customs bond system (CBMS, cbc.gov.bd) with OWASP ZAP and Burp Suite; performance-tested with JMeter and LoadRunner

Jr. Software QA Engineer
Sep 2021 – Nov 2022

Dynamic Solution Innovators — Dhaka

- Automated OpenCRVS—the UN-backed open-source civil registration system used by national governments—with Cypress; managed suites in TestRail with CI integration
- Manual QA for IPEMIS (education MIS managing records for millions of children), Movandi (5G mmWave), and Altech (clean energy)

Augmented Sr. SQA — Intellex via Tata Consultancy Services (US client, remote)
2024 - 2025

- Senior QA for a global Magento e-commerce platform (USA, UK, Canada, Europe): Selenium automation, multi-currency/multi-language coverage, 2FA (Twilio/SendGrid) and QuickBooks/ShipBob API integrations

Jr. Software QA Engineer (part-time) — CarryBags Ltd, London (remote)
Jul 2020 – Aug 2021

- First remote role—manual mobile QA (Android & iOS) and cross-device compatibility testing for a UK startup

SELECTED PROJECTS & OPEN SOURCE

EcomTestPilot — Production Playwright + TypeScript E2E framework: Docker on AWS EC2, PM2 scheduling, Teams alerts, HTML reports · github.com/azaworld/playwright-e2e-docker-aws

k6 GraphQL Load Testing — Scenarios, thresholds, Grafana dashboards, CI-ready · github.com/azaworld/k6-graphql-loadtesting

FirstTrip Playwright Framework — Full POM framework with GitHub Actions CI · github.com/azaworld/firsttrip-playwright-qa-automation

QA Roadmap — Open curriculum: Manual · Automation · AI · API · Performance · Security · github.com/azaworld/qa-roadmap

GenAI QA Experiments — LLM-powered API tooling and AI-assisted test generation · github.com/azaworld/Api-genAI

EDUCATION & CERTIFICATIONS

B.Sc. Engineering, Computer Science & Engineering — Shahjalal University of Science and Technology (SUST)
2017 – 2020

Machine Learning Specialization — Coursera (Stanford / Andrew Ng) · Programming for Everybody (Python) — Coursera (University of Michigan)

ADDITIONAL

Freelance: Upwork Top Rated — 23 completed engagements, every one rated ★5.0 (QA consulting, automation assessments, testing) · **Domains:** Healthcare (HIPAA), fintech (PCI-DSS), insurance, telecom, e-commerce, government · **Languages:** English (professional; daily with US/UK teams since 2020), Bangla (native)
